Education

Rowan University, Glassboro, NJ

May 2026

M.S. in Data Science — GPA: 3.90/4.00

★ Relevant Coursework: Visual Analytics, Big Data, MLOps, Data Mining, Advanced DBMS, Patient Data Privacy and Ethics, Applied Multivariate Data Analytics.

Modern Education Society's Wadia College of Engineering, Pune, India

2019 – 2023

B.E. in Computer Engineering — GPA: 9.09/10.00

★ Honors Program in Artificial Intelligence & Machine Learning

★ Relevant Coursework: Machine Learning, Data Structures, Data Science and Big Data Analytics, Cloud Computing.

Skills

★ **Data Analysis & Programming:** Python (Polars, Pandas, NumPy, SciPy), R, Scikit-learn, MLflow, Pydantic, Docker, Git.

★ **Databases & Analytics Platforms:** SQL (Joins, CTEs, Window Functions, Query Optimization), MongoDB, PostgreSQL, AWS (S3, EC2).

★ **Data Modeling & Visualization:** Power BI, Power Query, Semantic Modeling, Tableau, Excel (Pivot Tables, VLOOKUP), Streamlit, Plotly, Matplotlib, Seaborn.

★ **Technical Concepts:** Predictive Modeling, Machine Learning Pipelines, Statistical Analysis, Hypothesis Testing, A/B Testing, Data Validation, ETL Pipelines, Agile Methodologies.

Experience

IBM SkillsBuild AI Experiential Learning Lab

Remote

AI Transformation Fellow

2026

★ Collaborated with a multidisciplinary team to design an AI-driven healthcare solution focused on improving patient engagement and care coordination.

★ Analyzed current-state (“As-Is”) and future-state (“To-Be”) business workflows to identify opportunities for process improvement and AI adoption.

★ Contributed to documenting business requirements, workflow diagrams, and implementation recommendations for stakeholders.

Accenture

Remote

Data Analytics Virtual Experience Program

2024

★ Analyzed social media datasets to identify top-performing content categories and engagement trends.

★ Created data visualizations and reporting templates to communicate actionable insights to stakeholders.

1Stop.ai

Remote

Machine Learning Intern

2022

★ Performed exploratory data analysis and data quality checks on text and image datasets for classification tasks.

★ Improved model training efficiency by 15% through optimized preprocessing and feature extraction workflows.

Technical Projects

Chicago Transit Analytics & Prediction Pipeline

GitHub

★ Engineered an end-to-end data pipeline using a three-tier Medallion Architecture to ingest and clean 800,000+ transit records.

★ Leveraged Polars and SQL to clean and validate 800,000+ transit records, reducing invalid records by 20% and producing 644,000 analytics-ready records.

★ Developed interactive Streamlit dashboards to visualize trip demand, route trends, and operational KPIs for stakeholder reporting.

Insurance Risk Engine Validation Framework

Python, Pydantic, Pandas, Pytest

★ Formulated an automated data verification script to validate 10,000+ risk history records against core business data logic.

★ Implemented rigorous data validation models utilizing Pydantic to filter out source format anomalies, maintaining a clean analytics layer.

★ Established structural unit tests and robust exception logging with Pytest, cutting down code troubleshooting runtimes by 50%.

Certifications & Professional Development

★ **IBM SkillsBuild Credentials:** AI Experiential Learning Lab: Industry Immersion · Make Agentic AI Work for You · Enterprise Design Thinking Practitioner (2026)
