Education

Rowan University

Glassboro, NJ

Master of Science in Data Science — GPA: 3.90/4.00

May 2026

★ Relevant Coursework: Visual Analytics, Big Data, MLOps, Data Mining, Advanced DBMS, Patient Data Privacy and Ethics, Applied Multivariate Data Analytics.

Modern Education Society's Wadia College of Engineering

Pune, India

Bachelor of Engineering in Computer Engineering — GPA: 9.09/10.00

2019 – 2023

★ Honors Program in Artificial Intelligence & Machine Learning

★ Relevant Coursework: Machine Learning, Fundamentals of Data Structures, Data Science and Big Data Analytics, Cloud Computing.

Skills

★ **Databases & Analytics Platforms:** SQL (Joins, CTEs, Window Functions, Query Optimization), MongoDB, PostgreSQL, AWS (S3, EC2).

★ **Data Modeling & Visualization:** Power BI, Power Query, Semantic Modeling, Tableau, Excel (Pivot Tables, VLOOKUP), Streamlit, Plotly, Matplotlib, Seaborn.

★ **Data Analysis & Programming:** Python (Polars, Pandas, NumPy, SciPy), R, Scikit-learn, MLflow, Pydantic, Docker, Git.

★ **Technical Concepts:** Data Validation, ETL Pipelines, Data Warehousing, Dimensional Modeling, Hypothesis Testing, A/B Testing, Agile Methodologies.

Experience

IBM SkillsBuild AI Experiential Learning Lab

Remote

AI Transformation Fellow (IBM SkillsBuild Industry Immersion)

2026

★ Collaborated with a multidisciplinary team to design an AI-driven healthcare solution focused on improving patient engagement and care coordination.

★ Analyzed current-state (“As-Is”) and future-state (“To-Be”) business workflows to identify opportunities for process improvement and AI adoption.

★ Contributed to documenting business requirements, workflow diagrams, and implementation recommendations for stakeholders.

Accenture

Remote

Data Analytics Virtual Experience Program

2024

★ Analyzed social media engagement datasets to identify high-performing content categories and audience trends.

★ Developed data visualizations and insight reports to support data-driven content strategy recommendations.

1Stop.ai

Remote

Machine Learning Intern

2022

★ Performed exploratory data analysis and data quality checks on text and image datasets for classification tasks.

★ Improved model training efficiency by 15% through optimized preprocessing and feature extraction workflows.

Technical Projects

Chicago Transit Analytics & Prediction Pipeline

GitHub

★ Engineered an end-to-end data pipeline using a three-tier Medallion Architecture to ingest and clean 800,000+ transit records.

★ Leveraged Polars and SQL to clean and validate transit data, reducing invalid records by 20% and producing 644,000 analytics-ready records.

★ Developed interactive Streamlit dashboards to visualize trip demand, route trends, and operational KPIs for stakeholder reporting.

★ Optimized complex query executions by deploying indexes in MongoDB, accelerating visual performance and dashboard load speeds by 35%.

Insurance Risk Engine Validation Framework

Python, Pydantic, Pandas, Pytest

★ Formulated an automated data verification script to validate 10,000+ risk history records against core business data logic.

★ Implemented rigorous data validation models utilizing Pydantic to filter out source format anomalies, maintaining a clean analytics layer.

★ Established structural unit tests and robust exception logging with Pytest, cutting down code troubleshooting runtimes by 50%.

Certifications

★ **IBM SkillsBuild Credentials:** AI Experiential Learning Lab: Industry Immersion · Make Agentic AI Work for You · Enterprise Design Thinking Practitioner (2026)
